About me

Motivated B.Tech student with a strong foundation in computer science concepts and a growing interest in Artificial Intelligence and Web Development. Skilled in problem-solving, programming, and building user-friendly applications. Eager to apply technical knowledge and continuously learn new technologies to contribute effectively in a dynamic environment. I know basic of languages but i have strong foundation in java.

Education

10th Board form M.R Sarva Vidhyalaya, Jetlvasana	2021
<i>Strong academic performance with distinction, Gujarat Board</i>	<i>Percentage:90.83</i>
12th Board from Gokul Science School, Siddhupur	2023
<i>Higher Secondary-PCM student, Gujarat Board</i>	<i>Percentage:64.15</i>
Parul University, Vadodara	2023-2027
<i>Bachelor of Technology (B.Tech) in Computer Science Engineering</i>	<i>CGPA:8.23</i>

Skills

Languages: Java, Python, C, SQL, JavaScript, MongoDB, C++
AI/ML: Basic ML, Unsupervised Learning, Supervised Learning
Platforms comfortable with: GitHub, VS Code, IntelliJ IDEA, AWS Cloud
Concepts: Data Structures, OOPs, AI / ML Concepts, Android Development
Interpersonal: Public Speaking, Leadership, Critical Thinking, Creative Thinking, making content

Experience

Infosys Springboard Internship <i>Intern</i>	June 2026 – Present
- Working on a Smart Failure Detection System using Machine Learning techniques to predict & prevent system failures. - Developing and evaluating models such as Random Forest for classification and performance optimization. - Performing data preprocessing, feature engineering, and exploratory data analysis (EDA) on real-world datasets. - Contributing to AI Recruitment and Talent Management Copilot workflows and related automation tasks. - Collaborating with team members and mentors, presenting progress, and enhancing problem-solving and technical skills.	

Projects

Human Body Explorer <i>Full-Stack Web Application — HTML5, CSS3, JavaScript, LocalStorage</i>
Developed an interactive Human Body Explorer web application featuring structured modules for major body systems (digestive, respiratory, circulatory, nervous) with an intuitive UI; implemented user authentication, dynamic quizzes with real-time feedback, and a responsive progress dashboard; utilized JavaScript and LocalStorage for efficient client-side data persistence; and designed a clean, mobile-friendly interface using HTML5 and CSS3 to ensure accessibility across devices.
PriorityPing – AI-Based Smart Message Filtering System <i>Python, FastAPI, React.js, NLP, Machine Learning, MongoDB</i>
Developed an AI-powered message filtering system to prioritize important WhatsApp group messages using NLP and machine learning; built a text classification pipeline to detect high-priority content such as deadlines, announcements, and reminders; and implemented backend services using FastAPI and Python for efficient data processing and intelligent notification delivery.

Certifications

AWS Academy Graduate - AWS Academy Cloud Foundations <i>cloud foundations</i>
value added course- cloud computing and AI with AWS (badge)
Google for Education – Gemini AI <i>Gemini Certified University Student Google</i>
Generative AI fundamentals, Prompting techniques, Practical use of Google's Gemini AI tools, Responsible and safe AI practices (badge)
Foundation Course in Green Skills & AI (Skills4Future) <i>EDUNET</i>
Successfully completed a certified course focused on Green Skills and Artificial Intelligence. (Certificate)
Gen Academy 2.0
Gen AI Academy 2.0 (Hack2Skills) – AI/ML, Data, DevOps, Cloud Security, Networking, Serverless
